REASONS FOR ALLOWANCE

9. The following is an examiner’s statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, deploying, via the installed control bundle in response to the command issued by the application management server, the extracted native application directly within a native environment of the client device, the native environment being an environment of a primary operating system of the client device and separate from the control environment; and controlling the native application from the application management server within the native

Art Unit: 2191

environment via the control bundle installed within the control environment using the maintained link as substantially recited in independent claims 1, 8, 13, 23 and 27.

The closest cited prior art, Bansal (US 2003/0191823) teaches a method for controlling native applications. However, Bansal (US 2003/0191823) fails to teach deploying, via the installed control bundle in response to the command issued by the application management server, the extracted native application directly within a native environment of the client device, the native environment being an environment of a primary operating system of the client device and separate from the control environment; and controlling the native application from the application management server within the native environment via the control bundle installed within the control environment using the maintained link as substantially recited in independent claims 1, 8, 13, 23 and 27; and as pointed out by the applicant's remarks/arguments on pg. 20, par. 2 to pg. 22, par. 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
